

Under Packing

marks.3zET Packing

In order to obtain an optimum printing quality, no compromise can be made during the printing process. The tolerance range for the cylinder packing of calibrated sheets is some hundredths of a millimeter.

PrintGate's **marks.3zET** under packing is produced according to the thickness criterion and not according to the sheet weight. Our **marks.3zET** Under Packing Sheets have a low swelling tendency due to a special combination of active substances, the swelling that can occur along the edges due to the dampening water and solution is therefore prevented.

Our Product Range includes:

- Calibrated Under Packing Sheet
- Stick On Calibrated Underlay Foils

Non-Adhesive Underpacking & Stick On Underlay Foils

0.1mm thickness

650 x 530mm
730 x 595mm
750 x 620mm
1030 x 735mm

0.15mm thickness

650 x 530mm
730 x 595mm
750 x 620mm
1030 x 735mm

0.2 thickness

650 x 530mm
730 x 595mm
750 x 620mm
1030 x 735mm

0.3mm thickness

650 x 530mm
730 x 595mm
750 x 620mm
1030 x 735mm
